**Subject:** Cost saving after Air audit

Dear Panchu ,

As discussed with you till now according to the action points I have reduced the max pressure unloading of the compressor from 7.5 to 7

And loading from 6.5 to 6 .

Second action is the arresting of air leakage points which is however not completed across the plant but 50% is completed .

Based on the above two action points we have observed as 15 mwh of energy savings per month which will be costing around 60k per month .

Ritesh kumar
